

Safety Data Sheet (SDS) CAN SP/02

Page 1 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

First print date: 2017/07/17

Version: 2.1

SECTION 1. IDENTIFICATION OF THE SUBSTANCE AND OF THE COMPANY/UNDERTAKING

Product identifier:

Identification as on the label/Trade name: **CANOLA FEED**

Additional information: Product code CAN SP/02

Relevant identification uses of the substance and uses advised against:

Identified uses: Fertiliser.

Uses advised against: Use only as directed.

Details of the supplier of the Safety Data Sheet:

AECI Limited
14 Field Road, LILANTON

Emergency telephone numbers:

Griffon Poison information centre: 082 446 8946
Poisons Information Helpline: 0861 555 777
AECI Limited: (011) 823 8000 (o/h) Spill Tech: 086 100 0366 (a/h)

SECTION 2. HAZARD IDENTIFICATION

Classification of the substances or mixture

The mixture is classified as hazardous.

SANS 10234:2008, Regulation EC 1272/2008 [EU-GHS/CLP]	
Hazard classes/Hazard categories	Hazard statement
Serious eye damage (Category 1)	H318
STOT RE 2	H373
Hazardous to the aquatic environment (Acute 1)	H400
Hazardous to the aquatic environment (Chronic 1)	H410

For full text of H statements see section 16

The most important adverse effects

The most important adverse physiochemical effects: None.

The most important adverse human health effects: Causes serious eye damage.

Safety Data Sheet (SDS) CAN SP/02

Page 2 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

Hazard pictograms:

Signal Word: Danger

Hazard Statements: H318 Causes serious eye damage. H373 May cause damage to organs through prolonged or repeated exposure. H410 Very toxic to aquatic life with long lasting effects.

Precautionary Statements:

Prevention – P260 Do not breathe dust/spray. P280 Wear impervious rubber gloves and boots, protective clothing and chemical safety goggles. P264 + P265 Wash hands and face thoroughly after handling. Do not touch eyes.

Response – P319 Get medical help if you feel unwell. P305 + P354 + P338 IF IN EYES: Immediately rinse with water for several minutes. Remove contact lenses if present, and easy to do so. Continue rinsing.

Disposal – P501 Dispose of content/container in accordance with local legislation and requirements.

Special labelling of certain mixtures: None.

Other hazards: None.

SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS

Substance/Mixture: Mixture

Ingredients: Hazardous

Substance name (IUPAC/EC)	CAS –No.	Concentration % by weight	Classification
	EC-No.		
Manganese sulphate monohydrate	10034-96-5	30-40%	STOT RE (Category 2) H373. Aquatic chronic (Category 2) H411.
	231-089-9		
Zinc sulphate monohydrate	7446-19-7	1-10%	Acute toxicity oral (Category 4) H302. Serious eye damage (Category 1) H318. Aquatic acute (Category 1) H400 (M = 1). Aquatic chronic (Category 1) H410 (M = 1).
	231-793-3		
Copper sulphate pentahydrate	7758-99-8	1-5%	Acute toxicity oral (Category 4) H302. Serious Eye Damage/Irritation (Category 1) H318. Aquatic acute (Category) H400 (M=10). Aquatic chronic (Category 1) H410 (M = 10).
	616-477-9		

Safety Data Sheet (SDS) CAN SP/02

Page 3 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

Boric acid	10043-35-3	<5%	None as the concentration <5.5 % cut-off for Reproductive toxicity (Category 1B) H360 FD.
	233-139-2		
Citric acid monohydrate	5949-29-1	1-3%	Serious Eye Damage/Irritation (Category 2) H319.
	691-328-9		

Within the current knowledge of the supplier and in the applicable concentrations, there are no additional ingredients present in this fertilizer that are classified as hazardous to health or the environment that subsequently cause/contribute towards the classification, and that require reporting in terms of the South African Regulations for Hazardous Chemical Agents - 2021; Regulation 14(b).

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4. FIRST AID MEASURES

Description of first aid measures:

In case of inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Do NOT give mouth-to-mouth resuscitation if victim ingested or inhaled the substance. Keep person at rest and warm. Treat symptomatically and supportively as and when required. Obtain medical advice if necessary.

In case of skin contact: In case of contact, immediately flush skin with plenty of water for at least 15 minutes while removing contaminated clothing and shoes. Wash clothing before reuse. Thoroughly clean shoes before reuse. Get medical attention if irritation persist.

In case of eye contact: Check for and remove any contact lenses. In case of contact, hold eyelids apart and immediately flush eyes with plenty of water for at least 15 minutes. Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the eyelids by occasionally lifting the upper and lower lids. Cold water may be used. Obtain medical attention.

In case of ingestion: Do NOT induce vomiting unless directed to do so by medical personnel. Never give anything by mouth to an unconscious person. If conscious, rinse mouth thoroughly with water. Loosen tight clothing such as a collar, tie, belt or waistband. If vomiting occurs, lean patient forward or place on the left side (head-down position, if possible) to maintain an open airway and prevent aspiration. Refer for medical attention without delay.

Most important symptoms and effects, both acute and delayed:

Inhalation: Prolonged exposure may cause respiratory irritation.

Ingestion: May be harmful if swallowed.

Skin contact: Contact may cause some irritation.

Eye contact: Causes serious eye damage.

Indication of any immediate medical attention and special treatment needed:

There is no specific antidote. Treat supportively and symptomatically.

SECTION 5. FIRE -FIGHTING MEASURE

Extinguisher media:

Suitable extinguisher media: Use foam, dry chemical powder or carbon dioxide.

SMALL FIRE: Extinguish small fires with carbon dioxide, dry powder, or alcohol-resistant foam.

LARGE FIRE: Water spray can be used for larger fires or cooling of unaffected stock but avoid the accumulation of polluted run-off from the site

Safety Data Sheet (SDS) CAN SP/02

Page 4 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

Unsuitable extinguishing media: Do not use high volume water jet due to contamination risk.

Special hazards arising from the mixture:

Nature of decomposition products not known for the product.

Advice for fire-fighters:

Stay at a maximum distance and avoid inhaling hazardous vapours. Keep container cool by spraying with water. Fire-fighters should wear positive pressure self-contained breathing apparatus (SCBA) and full turnout gear. Be sure to use an approved/certified respirator or equivalent.
Act in accordance with the site's Internal Emergency Plan and the Workplace Specific Procedures for actions to be taken after an accident or other emergencies.

SECTION 6. ACCIDENTAL RELEASE

Personal precautions, protective equipment and emergency procedures:

For non-emergency personnel: Isolate area. Keep unnecessary and unprotected personnel from entering the area. Use appropriate safety equipment. For additional information, refer to Section 8, Exposure Controls and Personal Protection. Avoid contact with skin, eyes, and clothing.

For emergency responders: Do not breathe in dust and avoid contact of the spilt material with eyes, skin or clothes. Wear appropriate protective clothing recommended in Section 8 of the SDS. Evacuate personnel to a safe area when necessary. Ventilate the area of the spill or leak, especially when in confined areas. Isolate the spill area and limit the access to emergency responders only. Do not touch or walk through spilled material as this could cause contamination. Contain spills if it can be done without risk and clean-up immediately.

Environmental precautions:

Prevent spillage if safe to do so. Do not allow the spilt product to enter water courses and drains and avoid contact with soil. Do not allow the spilt product to spread to other areas - keep the spilt material contained and isolated. Report spills and releases as required to appropriate authorities if the spilt product has caused environmental pollution (sewers, water ways, soil or air).

Methods for containment and cleaning up:

For small spills. Sweep up the spilt product. Place into a labelled waste container with a shovel and cover for subsequent disposal. Dispose of collected spilt material as hazardous waste. Clean the contaminated surface with water to remove any residues of the spilt product. Keep the wash water out of drains, sewers and waterways.

For large spills. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect the spillage. Place into a labelled container for disposal according to local regulations.

Reference to other sections:

See section 1 for emergency contact information.
See section 7 for information on safe handling.
See section 8 for information on personal protection equipment.
See section 13 for information on disposal.

Additional information:

None known.

Safety Data Sheet (SDS) CAN SP/02

Page 5 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

SECTION 7. HANDLING AND STORAGE

Precautions for safe handling:

Always provide good ventilation in the work area. Do not breathe in dust. Wear protective clothing and equipment during handling as described in Section 8 of the SDS. Wash the hands and face thoroughly with soap after handling. Keep containers closed when not in use. Do not permit smoking in use or storage areas. Locate emergency showers and eye-rinsing facility near the work/handling area. Remove contaminated clothing immediately if the product gets inside. Contaminated work clothing should not be allowed out of the workplace. Work clothes should be separately laundered. Launder contaminated clothing before re-use. Keep unprotected persons away from the area where the product is being applied.

Protective measures: Observe directions on label and instructions for use.

Advice on general occupational hygiene: Do not eat drink or smoke when handling this product.

Regular cleaning of work area and work clothing is recommended. Maintain good normal industrial hygiene and housekeeping practices in areas where the product is used/handled.

Conditions for safe storage, including incompatibilities:

Store product in a segregated and secured area below 35°C. The entrance to storage facilities should be granted only to appropriately trained personnel. Keep containers tightly closed when not in use. Store only in properly labelled containers. The product is stable if stored well ventilated, out of direct sunlight, cool and free of moisture and high humidity. Keep out of reach of children, uninformed persons and animals. Protect containers from physical damage and check the condition of storage containers periodically (e.g. for leaks). Avoid cross contamination with other agricultural products. Store in accordance with national and local regulations.

Specific end uses:

Use as directed on the label. Use original container.

SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Control parameters:

Occupational exposure limits (OEL): No occupational exposure limits for the ingredients have been established. The ingredients may however pose a health risk.

Biological exposure indices (BEI): None

Additional exposure limits under the conditions of use: None known.

Exposure control: Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of workday. A Risk Assessment should be conducted before handling is to commence to determine specific exposure control.

Appropriate engineering controls: Use local exhaust ventilation, or other engineering controls to maintain dust, if available maintain airborne levels below exposure limit requirements or guidelines.

Hygiene measures: Wash hands, forearms and face thoroughly after handling the product, before eating, smoking and using the lavatory and at the end of the working period. Ensure that eyewash stations and safety showers are close to the workstation location and are easily accessible. Handle the product in accordance with good industrial hygiene and safety practice. Keep the product away from food, drink and animal feeding stuffs.

Eye/face protection: Chemical protective goggles with full seal is recommended.

Safety Data Sheet (SDS) CAN SP/02

Page 6 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

Hand protection: Use chemical resistant gloves. Examples of preferred glove barrier materials include Nitrile/butadiene rubber, Polyethylene, Ethyl vinyl alcohol laminate, Polyvinyl alcohol, Polyvinyl chloride.

Body protection: Wear appropriate impervious clothing e.g. overalls, aprons, shoes and socks to prevent skin contact and contamination of personal clothing. Keep working clothes separately.

Respiratory protection: Dust mask may be required in high dust areas. In addition, respiratory protection may be required when ventilation is inadequate, or discomfort is experienced; use an approved air-purifying respirator. Respiratory protection should be worn when there is a potential to exceed the exposure limit requirements or guidelines.

Environmental exposure controls: Prevent product from entry into sewers and water courses.

SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES

Information on basic physical and chemical properties

Appearance (form): Mixture of granules and powder.

Colour: Blue and white.

Odour: Not known.

Odour threshold: No information available.

pH (at concentration): 4.1 (3kg/100ℓ).

Melting point/range (°C): No information available.

Boiling point/range (°C): No information available.

Flash point (°C): No information.

Evaporation rate: No information available.

Flammability (solid, gas): No information available

Ignition temperature (°C): No information available.

Upper/lower flammability/explosive limits: No information available.

Vapour pressure (20°C): No information available.

Vapour density: No information available.

Density: No information available.

Water solubility: >6kg/110ℓ.

Safety Data Sheet (SDS) CAN SP/02

Page 7 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

n-Octanol/Water partition coefficient: No information available.

Auto-ignition temperature: No information available.

Decomposition temperature: No information available.

Viscosity, dynamic (mPa s): No information available.

Physical hazards:

Explosive properties: None.

Other information:

Fat solubility (solvent-oil to be specified): No information available.

Bulk density: No information available.

Dissociation constant in water (p Ka): No information available.

Oxidation-reduction potential: No information available.

SECTION 10. STABILITY AND REACTIVITY

Reactivity:

The product is stable under normal conditions.

Chemical stability:

Stable under normal storage conditions for 2 years.

Possibility of hazardous reactions:

No information available.

Conditions to avoid:

No information available.

Incompatible materials:

Reactive with reducing agents, strong oxidising agents and acids.

Hazardous decomposition products:

Sulphur oxides. Manganese/manganese oxides, copper oxides, boron oxides, zinc oxides.

SECTION 11. TOXICOLOGICAL INFORMATION

Toxicokinetics, metabolism and distribution:

Non-human toxicological data: No Information available for the product.

Method: No Information available.

Dosage: No Information available.

Routes of administration: No Information available.

Safety Data Sheet (SDS) CAN SP/02

Page 8 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

Results: No Information available.

Absorption: No Information available.

Distribution: No Information available.

Metabolism: No Information available.

Excretion: No Information available.

Information on toxicological effects:

Acute toxicity:

The product is of low acute toxicity.

Manganese sulphate monohydrate

Harmful: danger of serious damage to health by prolonged exposure if swallowed.

Zinc sulphate monohydrate:

Acute toxicity oral LD₅₀ for rat 2150 mg/kg.

Copper sulphate pentahydrate:

Acute toxicity oral LD₅₀ for rat 482 mg/kg. (OECD test guideline 401)

Chronic toxicity: No information available.

Skin corrosion/irritation: No information available for the product. Based on available data of the ingredients in the product, the classification criteria are not met for Skin Corrosion/Irritation.

Serious eye damage/irritation: Based on available data for the ingredients in the product, the classification criteria are met for serious eye damage.

Respiratory or skin sensitization: No information available for the product. Based on available data for the ingredients in the product, the classification criteria are not met for Respiratory/Skin Sensitization.

Germ cell mutagenicity: No information available for the product. Based on available data for the ingredients in the product, the classification criteria are not met for Germ Cell Mutagenicity

Manganese sulphate monohydrate

Hamster (Manganese Sulphate Monohydrate) ovary. Cytogenetic analysis in hamster ovary.

Sister chromatid exchange

Mouse- Micronucleus test. Mouse- Cytogenetic analysis. Mouse in sperm.

Carcinogenicity: No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.

Reproductive toxicity: No information available for the product. Based on available data for the ingredients in the product, the classification criteria are not met for Reproductive Toxicity.

Safety Data Sheet (SDS) CAN SP/02

Page 9 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

STOT- Single Exposure: No information available for the product. Based on available data for the ingredients in the product, the classification criteria are not met for STOT – Single Exposure.

STOT-Repeated Exposure: No information available for the product. Based on available data for the ingredients in the product, the classification criteria are met for STOT – Repeated Exposure.

Aspiration hazard: No information available for the product. Based on available data for the ingredients in the product, the classification criteria are not met for Aspiration Hazard.

Additional information: None available for the product.

SECTION 12. ECOLOGICAL INFORMATION

Toxicity:

This product is very toxic to aquatic organisms with long lasting effects.

Information on toxicological effects:

Product/ingredient Name	Species and Genus	Exposure (hours/days)	Result in fresh water
Copper Sulphate Pentahydrate	Crustaceans (Daphnia magna)	48h	Acute EC ₅₀ : 0.024mg/L
Zinc Sulphate Monohydrate	Fish (Pimephales promelas)	96h	Acute LC ₅₀ : 0.330mg/L

Persistence and degradability:

No information available for the product.

Bioaccumulative potential:

No information available.

Mobility in soil

Very soluble in water.

Other adverse effects:

No information available.

SECTION 13. DISPOSAL CONSIDERATIONS

Waste treatment methods:

Treat as hazardous waste and do not dispose of the product as general waste. Dispose product related waste and packaging in accordance with all local, provincial and national regulations e.g. the Waste Classification and Management Regulations (GN 634 of 2013), R634 Waste Classification & Management Regulations, R635 National Norms & Standards for the Assessment of Waste for Landfill Disposal and R636 National Norms & Standards for Disposal of Waste to Landfill. Prevent the contamination of water, food, or feed by storage or disposal of the waste. Do not use empty containers for any other purpose. Special help is available for the disposal of Agricultural Chemicals. The product label will supply general advice regarding disposal of small quantities, and how to cleanse containers. Avoid and minimize the generation of waste.

Safety Data Sheet (SDS) CAN SP/02

Page 10 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

Product/ packaging disposal:

Treat contaminated packaging as hazardous waste as dispose of as required by the legislation. Do not reuse or refill containers. Triple rinse container (or equivalent) promptly after emptying and offer for recycling - if an available option. Recondition if appropriate, or puncture and dispose of in a hazardous waste landfill, or by other procedures approved by the local authorities.

SECTION 14. TRANSPORT INFORMATION

	Land transport (ADR/RID)	Sea transport (IMDG)	Air transport (ICAO/IATA)
UN-Number	3077	3077	3077
UN Proper shipping name:	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S (Copper sulphate)	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S (Copper sulphate)	ENVIRONMENTALLY HAZARDOUS SUBSTANCE, SOLID, N.O.S (Copper sulphate)
Transport hazard class:	9	9	9
Packaging group:	III	III	III
Marine pollutant:	Yes	Yes	Yes
Special precautions for user:	Causes serious eye damage	Causes serious eye damage	Causes serious eye damage
Transport in bulk according to MARPOL 73/78 Annex II and the IBC code	Not required	Not required	Not required

Inland waterways: Not required.

Emergency response information: Not required.

SECTION 15. REGULATORY INFORMATION

Safety, health and environmental regulations/legislation for the mixture:

Relevant information regarding authorization: Occupational Health and Safety Act 1993. Regulation for Hazardous Chemical Agents, 2021. UN Recommendations on the Transport of Dangerous Goods Model Regulations Rev. 21 (2019), Globally Harmonized System of Classification and Labelling of Chemicals (GHS) Rev 9, 2021.

ACGIH: American Conference of Governmental Industrial Hygienists (ACGIH).

Relevant information regarding restrictions:

EU regulations: Regulation EC 1272/2008 [EU-GHS/CLP].

Other National regulations: National Road Traffic Act, 1996 (ACT NO. 93 of 1996).

SANS 10228:2012- The identification and classification of dangerous goods for transport by road and rail modes.

National Environmental Management: Waste Act 59 of 2008.

Chemical Safety Assessment carried out? No.

SECTION 16. OTHER INFORMATION

Indication of changes:

Formulation change section 1, 2 and 3.

Safety Data Sheet (SDS) CAN SP/02

Page 11 of 11

According to SANS 10234/UN GHS 9th edition
Revision Date: 2022/03/16

Relevant classification and H statements (number and full text:

Aquatic acute 1: Hazardous to the aquatic environment (Acute 1)
Aquatic chronic 1: Hazardous to the aquatic environment (Chronic 1)
Aquatic chronic 2: Hazardous to the aquatic environment (Chronic 2)
STOT RE 2: Specific Target Organ Toxicity repeated exposure (Category 2)

H302 Harmful if swallowed. H315 Causes skin irritation. H318 Causes serious eye damage. H319 Causes serious eye irritation. H360 FD May damage fertility. Suspected of damaging the unborn child. H373 May cause damage to organs through prolonged or repeated exposure. H400 Very toxic to aquatic life. H410 Very toxic to aquatic life with long lasting effects. H411 Toxic to aquatic life with long lasting effects.

Training instructions:

Use as indicated on the label, special training may be required for application.
